

BLOCKED

Three red lines are still in the cut: a misquote, bodycam with the source logo cropped out and the wrong agency named, and photos of a homicide victim with no consent.

Third-party material: 109.6 s of 155.0 s (71% of runtime). Own AI and graphics: 45.4 s. Video file: LoriVallow_EP01_The_Man_Who_Was_Afraid_v7_captions_1080p.mp4, 1080×1920.

TOP THREE FIXES

1. Fix the quote on screen and in the voiceover: the 'exact words' are not in the court papers (issue A).
2. Replace the bodycam: it is a Law&Crime copy with the logo cropped out and the wrong agency tag (issue B).
3. Get written family consent for the four photos of Charles, or replace them (issue C).

This is a self-check, not a sign-off. Verdicts are internal working rules under the Osira Sourcing Guide, not legal advice. A producer must approve before release; edge cases go to counsel. Most likely claimants: Law&Crime (bodycam copy) and the Vallow family (Charles's photos).

What is fine: the court-record pages are public record and are read aloud; the interview shots are the subject's own statements; the own AI shots show no faces. Those still need the fixes listed in the table.

ISSUES

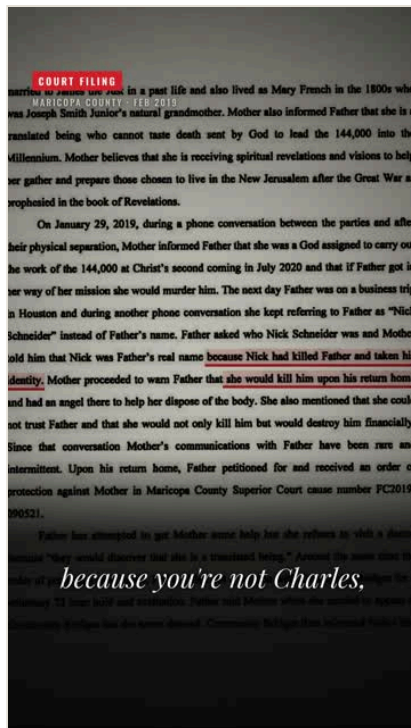

A. QUOTED WORDS ARE NOT IN THE RECORD

122.6 to 132.0 (quote cards at 126.3 to 132.0; AI hand at 122.6)

Red

Frame from v7: 127.0 s

Frame from v7: 129.5 s

Found: Narration and captions give 'I will kill you, because you're not Charles, and nobody will care' as the exact words Lori said, written in the court papers. We read all 19 filing pages (OCR): those words appear on none of them. Page 4 says only that she 'would kill him upon his return home'. A summary of the police report on Court TV quotes different words ('You're not Charles. I don't know who you are or what you did with Charles, but I can murder you now with my powers'). We could not open that page (blocked), so that wording is also UNVERIFIED.

Why it matters: A misquote tied to a named person, with quotation marks and 'exact words'. This is a red line (invented or misquoted words).

Fix: Use only the petition's own words in quote marks ('she would kill him upon his return home', page 4), or paraphrase with no quote marks. The voiceover also says the line, so the producer must re-record or soften that sentence. Verify any other wording against the original at its timestamp.

B. BODYCAM COPY WITH THE LOGO REMOVED, AND THE WRONG AGENCY ON SCREEN

11 shots: 31.95, 77.3, 84.2, 112.3, 132.0, 134.2, 143.1, 145.8 (bodycam); 36.6, 80.9, 140.9 (unidentified or unverified) Red

Frame from v7: 33.0 s

Source file: Law&Crime logo bottom left
(not in our cut)

Found: Our bodycam file shows a Law&Crime logo (bottom left of the original). We cropped the frame so the logo is out of the picture, then zoomed in. KUTV (opened) states Gilbert Police released this footage; our tags say Chandler Police on every shot. The producer's own README says these clips are 'rough-cut use only, not cleared for broadcast'. Seven of the eight bodycam shots show no statement at all, only mood.

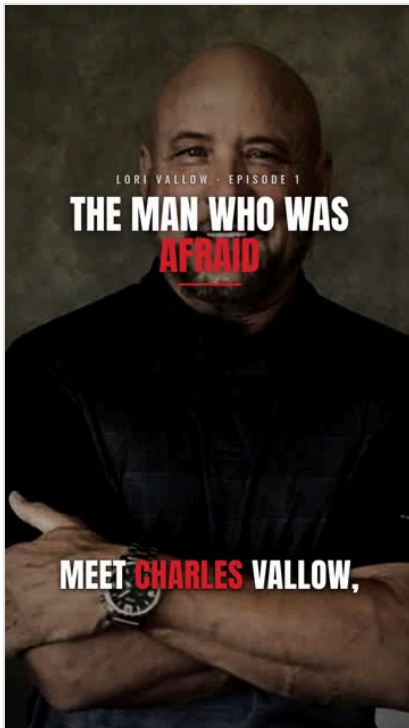

Why it matters: Law&Crime is on the never list; stripped logos are a red line; a wrong source tag is a false record on screen; mood footage fails test 1.

Fix: Re-take the one clip that carries Charles's statement from Gilbert PD's own release (public records) the approved way, tag it Gilbert Police Department with the exact date. Replace the rest with own graphics, AI or court record. Never crop a logo out.

C. PHOTOS OF CHARLES VALLOW (A HOMICIDE VICTIM), NO CONSENT, UNKNOWN OWNERS

0.0, 14.9, 25.1, 87.3

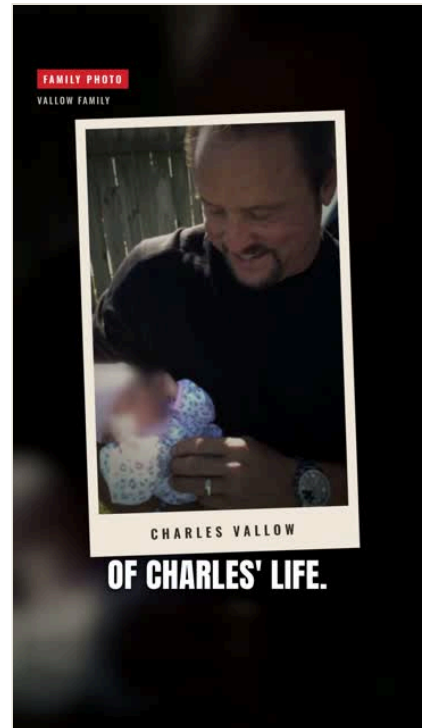

Red

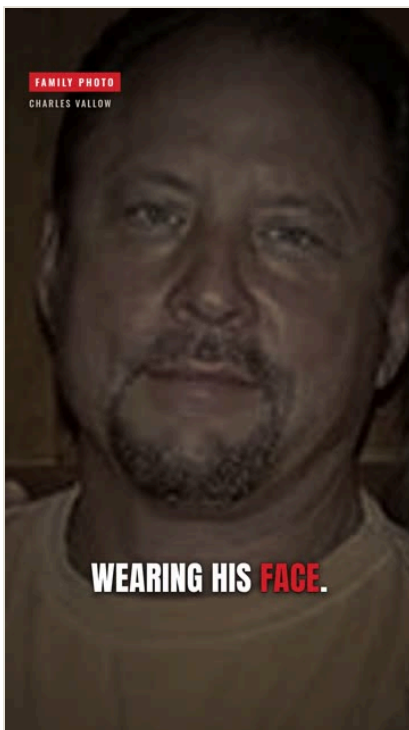

Frame from v7: 1.0 s

Frame from v7: 16.0 s

Frame from v7: 26.5 s

Frame from v7: 88.8 s

Found: Four photos of Charles: the opening portrait, the wedding photo, the photo holding a baby, and a close portrait. None has a traced owner. The baby photo also shows a minor (face blurred by us). Charles was killed on 11 July 2019 (KSL, opened).

Why it matters: Victims' photos need written family consent (V15). German post-mortem image rights run 10 years after death, so until 2029 (s. 22 KUG).

Fix: Get written consent and the original file for each, or replace with a title card, a text card ('Charles Vallow, 62') or the court record.

D. AI LABELS TOO SMALL AND NOT THE REQUIRED WORDING; CHILDREN SHOWN AS AI STAND-INS

All AI shots (s03 to s10, s16, s17, s25b, s27, s29, s31)

Fix

Frame from v7: 11.0 s

Frame from v7: 66.0 s

Found: Labels read REENACTMENT or ILLUSTRATION at about 19 px, top right. The rule asks for a readable KI-GENERIERT / AI-GENERATED. The AI shots are photoreal and stand in for real people, including children (Tylee and J.J.) in four shots.

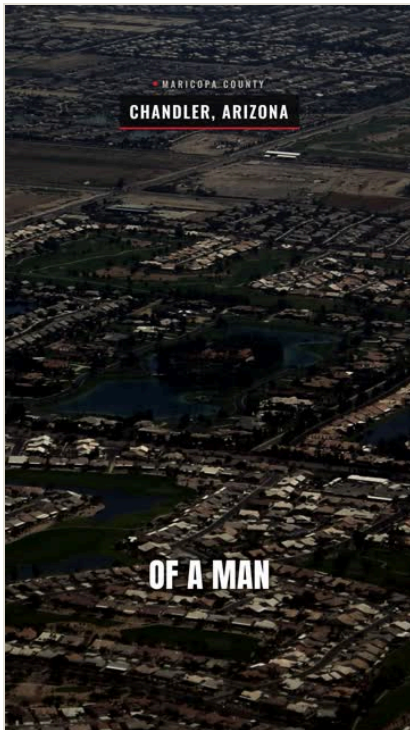

Why it matters: EU AI Act Art. 50(4) disclosure; the guide says no single private person or child shown.

Fix: Replace every label with 'KI-GENERIERT / AI-GENERATED', larger and on screen for the whole shot. Counsel or producer to decide whether AI children from behind are acceptable.

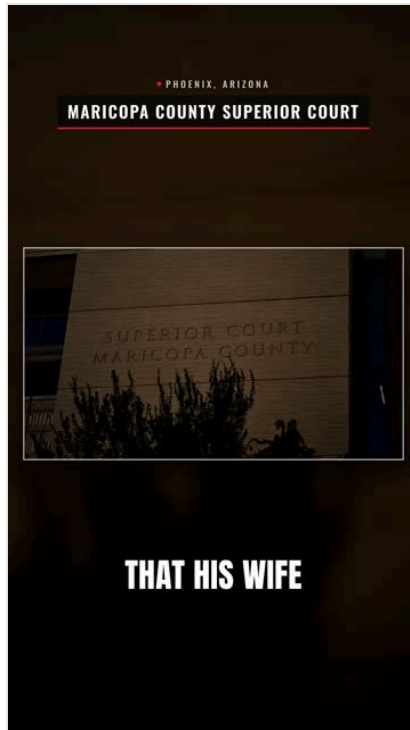

E. CREATIVE COMMONS CREDITS MISSING; SHARE-ALIKE

4.55 and 136.4

Fix

Frame from v7: 6.0 s

Frame from v7: 138.0 s

Found: The Chandler aerial is CC BY-SA 2.0 (Chris J). The court sign is CC BY 2.0 (Tony Webster). Neither is credited on screen or in an end card. The aerial was cropped and graded, and BY-SA requires an edited version to be shared under the same licence.

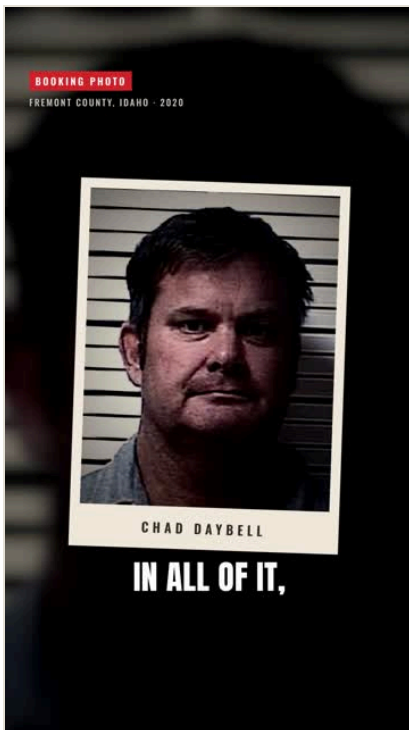

Why it matters: CC BY needs credit in the required format; CC BY 4.0 s. 2(a)(5)(B) leaves the DRM question open for counsel.

Fix: Add credits in the form 'Owner, licence, edited by Osira' on screen and in the end card; save a dated licence page per image; send the share-alike and DRM points to counsel.

F. SOURCES NOT TRACED OR NOT VERIFIED

36.6, 80.9, 94.9, 44.7, 40.9, 73.4, 102.6, 48.9 to 132.0 (filing pages)

[Fix](#)

Frame from v7: 96.5 s

Found: The Lori car clip is tagged 'Arizona Police 2019' and the garage clip 'Chandler Police 2019' with no proof. The Chad Daybell photo came inside a TV-style graphic. Both booking photos came as image files with no agency release. The interview video is an unconfirmed copy. The filing page images have a stray file name ('004.jpg') visible at the top on screen.

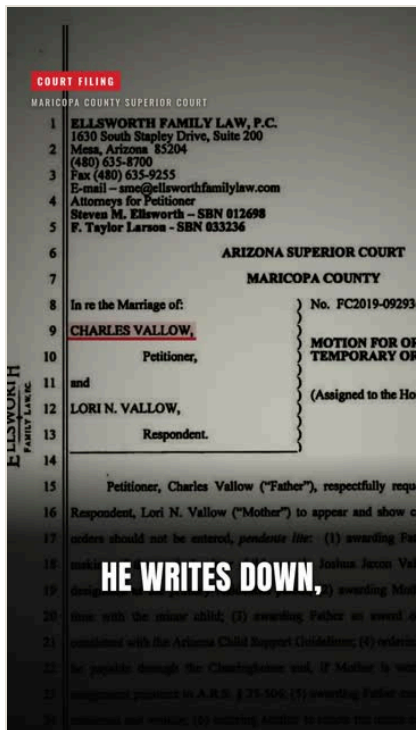

Why it matters: The agency, owner and method for these files are unknown; on-screen tags might be false.

Fix: Trace each to the owner's own release, correct or drop the tags, and remove the stray file name. Log how each file was obtained, truthfully.

G. MINOR'S NAME VISIBLE IN THE FILING

119.5 to 122.6

Edge

Frame from v7: 121.0 s

Found: Page 1 of the petition shows the child's name in the case text. The law firm's street address and email are also readable on the same page.

Why it matters: Minors should not be identifiable; the address and email are public record but not needed.

Fix: Blur the minor's name; consider blurring the address and email.

H. CALENDAR SHOWS A CIRCLED DATE NO SOURCE GIVES

64.9 to 67.8

Edge

Frame from v7: 66.0 s

Found: The AI calendar (JULY 2020) has the 24th circled. The narration says only 'the summer of 2020'.

Why it matters: A made-up detail presented as part of the story.

Fix: Remove the circle or use a neutral calendar.

QUESTIONS FOR COUNSEL

1. CC BY-SA 2.0 (Chandler aerial): do the share-alike terms bind our cropped, colour-graded version when shown inside a paid app?
2. CC BY 4.0 s. 2(a)(5)(B) and DRM: any CC licensed image or clip inside a DRM-protected app, until you confirm this point is safe (applies to the court sign and the aerial).
3. Charles Vallow's photos: who can give consent (family, estate), and does s. 22 KUG (10 years after death, to July 2029) apply to the baby photo and the portraits?
4. AI stand-ins for real children from behind (Tylee, J.J.): acceptable, or blur or remove?
5. Booking photos of convicted people for a German audience: any restriction beyond the agency source?
6. Bodycam: if Gilbert PD's own release is public, does a Law&Crime copy change anything, and what exact credit line is required?
7. A minor's name inside a court record shown on screen: blur or acceptable?

NOT CHECKED

- Voiceover: supplied by the producer; not reviewed for rights or for an AI or cloned voice.
- Background music: supplied by the producer; licence not on file.
- Sound effects: bass hits come from the HyperFrames bundled library; other SFX were synthesised by us. Licence of the bundled files not checked.
- Source codes: no footage/sources.csv exists for this show, so no source codes are logged.

- OSIRA_CONTEXT_HANDOFF.md and the source registry were not available, so every source was researched from scratch and nothing was reused.
- How each file was obtained: the producer supplied the files; the capture method is not recorded for any of them.
